

## Technical Data

|   |  |
|---|--|
| Measuring range                               | 5 - 2000 grams                         |
| Smallest detectable weight tolerance          | 0,8 g (1% of FS weight)                |
| Dimension weighing plate                      |  |
| Standard version                              | 500 x 375 x 100/50 mm                  |
| other dimensions                              | according to customer's requirements   |
| Direction of tilting                          | correct parts - out of tolerance parts |
| Power supply                                  | 115 / 230 VAC 0,15 / 0,3 A             |
| Plug connection to <u>die casting</u> machine | Harting plug, HAN-E, 6-pole            |
| Connection cable                              | 5m (standard)                          |
| System pressure for weighing plate            | 4 - 6 bar max.                         |

## Description

Setup via keyboard. Display indicates part weight in grams, tolerances in grams or % of total weight and error messages. Digital automatic Zero compensation after each weighing cycle. Relay outputs. Weighing plate stainless steel with 100/50 mm high side walls.

## Option

Serial interface for PC, printer, etc.

## Application

- for control of completeness after assembly
- manufacturing reports
- quality control

## Advantages:

- very fast weighing process
- user-friendly scale
- robust construction
