

## Technical Data

Smallest detectable weight tolerance	0,8 g (1% of FS weight)
Dimension weighing plate	520 x 375 x 115/55 mm
Dimension weighing plate (large)	from 100 to 400t locking force
Dimension weight sensing device	450 x 345 x 235 mm
Direction of tilting	left / right selectable
Power supply	115 / 230 VAC 0,15 / 0,3 A
Plug connection to <u>die casting</u> machine	Harting plug, HAN-E, 6-pole
Connection cable	5m (standard)
System pressure for weighing plate	4 - 6 bar max.

## Description

Setup via keyboard. Display indicates part weight in grams, tolerances in grams or % of total weight and error messages. Digital automatic Zero compensation after each weighing cycle. Relay outputs. Weighing plate stainless steel with 120 mm high side walls.

## Option

Serial interface for PC, printer, etc.

## Application

- Zinc die casting
- in front of dcm via a chute
- manufacturing reports
- quality control
- die protection
- also suitable for injection moulding machines for the production of injection mouldable plastic parts

## Advantages

- very fast weighing process
- user-friendly scale
- robust construction
- quality product made in Germany
