

PPW 3000 Double tilt high speed weight sensing device for zinc die casting

manufacturer :
partnership

Product number:
AW3003

Description

Introducing the **PPW 3000 Double Tilt High Speed Weight Sensing Device for Zinc Die Casting**

The PPW 3000 is a cutting-edge **weight sensing device** designed specifically for **zinc die casting** applications. Offering precise measurements and control, this device is ideal for ensuring the accuracy of your production process.

Key Features:

- **Double tilt** design for correct parts and out of tolerance parts
- Model: PPW 3000
- Drive of weighing plate: electro-pneumatical
- Control system: microcomputer
- Weighing cycle time: 3.5s
- Measuring range: 5 - 2000 grams

- Smallest detectable weight tolerance: 0.8g
- Dimension weighing plate: 500 x 375 x 100/50 mm
- Power supply: 115 / 230 VAC 0.15 / 0.3 A

With features such as digital automatic Zero compensation and relay outputs, the PPW 3000 offers **die-protection** and accurate **ejection control** for your **die casting machine**. Upgrade your production line with the PPW 3000 for seamless operation and reliable results.

Option

Serial interface for PC, printer, etc.

Application

- Zinc die casting in front of dcm via a chute
- manufacturing reports
- quality control
- die protection

Advantages:

- very fast weighing process
- user-friendly scale
- robust construction
